

# LifeBook E8410 Notebook

*Supplying more power and better performance with next-generation Intel® Centrino® Duo Mobile Technology and optional Intel Centrino Pro Processor Technology, the Fujitsu LifeBook® E8410 notebook provides a highly flexible platform that can be configured to meet a diverse array of business demands. When coupled with renowned Fujitsu product reliability and durability, this notebook will shorten your return on investment cycle and lighten the load on your IT technical support.*

## BENEFITS

### Performance

The LifeBook E8410 notebook is available with Intel Centrino Duo Mobile Technology. With its two execution cores, the Intel® Core™ 2 Duo Processor is optimized for multi-threaded applications and multitasking.

The LifeBook E8410 notebook also features an optional powerful mobile GPU—NVIDIA® GeForce® 8400M G. The NVIDIA® GeForce® 8400M G is the ideal solution for today's business professionals because it not only provides the horsepower needed to drive visual applications, it also provides the tools needed to build more compelling visual communications with rich multimedia.

### Easy Deployment & Management

Simplify deployment and management—and ultimately reduce TCO—with the following features:

- A modular bay fits a variety of devices, including a DVD-ROM, DVD/CD-RW Combo Drive, Dual-Layer Multi-Format DVD Writer, modular bay battery, and a convenient weight saver.
- High-capacity and modular bay batteries are available for extended computing time
- The notebook is equipped with serial, parallel, S-Video out and IEEE 1394 ports
- A variety of communications options are available to seamlessly integrate into your corporate environment
- A port replicator—compatible with the LifeBook E8410, E8310, E8210, E8110 and S7110 notebooks—is also available for simple connection to all your peripherals
- Optional Intel® Centrino Pro processor technology

### Security

The LifeBook E8410 notebook offers a combination of physical hardware and software security solutions to provide the highest levels of mobile computer protection. When the time comes for an organization to implement one or more security features, the LifeBook E8410 notebook is ready for deployment.

Fujitsu offers a built-in biometric fingerprint swipe sensor that eliminates the need for managing multiple passwords when accessing the network and managing email accounts, as well as other protected systems.

The embedded TCG 1.2-compliant Trusted Platform Module (TPM) protects digital identification and data, and authenticates you into your network.

It also allows users to securely store private keys and certificates for file and folder encryption, Web, email, digital signatures, and passwords.

The dedicated Smart Card slot supports a wide range of third-party applications, such as secure online transactions, personalized authentication services, access to personal data, and “e-cash” storage options.

With more than 800,000 possible passwords, the integrated Security Panel system adds another measure of security to help secure your data. The LifeBook E8410 notebook also features two-level hard drive and BIOS password protection, allowing system administrators to have a password that's secret from users, and can be used to unlock the device if the user password is lost.

### Flexible Connectivity

With both 56K modem and Gigabit (10/100/1000) Ethernet LAN built-in, you can easily connect to your office network and the Internet at home or at work. For wireless connectivity, the Wi-Fi® Certified Intel® WiFi Link 4965AGN offers seamless and flexible connectivity with either high-speed connection. If you use a Bluetooth-enabled cellular phone or PDA, your LifeBook E8410 notebook can be equipped with integrated Bluetooth (version 2.0) wireless technology for data synchronization and swapping images or data.

### Stable and Reliable

The LifeBook E8410 has a sturdy magnesium cover—a feature that has contributed to LifeBook notebooks being named some of the most reliable in the industry. The new LifeBook E8410 notebook also features a strong exterior, stainless-steel hinges, and a spill-resistant keyboard.

In a time when most PCs are assembled by third-party vendors, Fujitsu takes pride in its own world-class design, rigorous testing, and manufacturing capabilities. Fujitsu provides extremely high quality mobile computers with one of the lowest failure rates in the industry.

## OVERVIEW

- Stylish yet durable design: top-notch performance in a notebook that weighs around 6 lbs.
- Brilliant 15.4" widescreen display for optimized viewing
- Latest Intel Centrino Duo Mobile Technology for seamless connectivity, long battery life, and great performance
- Optional integrated 1.3 mega-pixel webcam for instant messaging and video conferencing
- Optional Intel® Centrino Pro Processor Technology for better remote manageability and security
- Dual pointing options with touchpad and quick point
- Extensive security features
- Ideal connectivity through optional Wireless LAN and Bluetooth

## Consumer Sales (24/7):

1.800.FUJITSU

www.shopfujitsu.com

1) Preinstalled with a free 90-day trial version of Symantec Norton Internet Security 2006. The 90-day trial version is activated upon user's acceptance of software license agreement. After 90 days, the user must purchase a subscription from Symantec to download latest virus definitions.

2) Total Available Graphics Memory refers to the new Windows Vista classification of graphics memory, which is the total of Dedicated Video Memory, System Video Memory and Shared System Memory.

3) One gigabyte (GB) = one billion bytes; accessible capacity will be less and actual capacity depends on the operating environment and formatting.

4) The internal modems on all Fujitsu notebooks from Fujitsu Computer Systems Corporation are only qualified for use with telephone systems in selected countries, including the United States and Canada. For a list of certified countries, please check <http://www.computers.us.fujitsu.com/modems>.

5) Actual speeds over U.S. telephone lines vary, and are less than 56 Kbps due to the current FCC regulations and line conditions.

6) Requires subscription to Computrace or LoJack for Laptops

7) Battery life estimates reflect the results of BAPCo MobileMark2005 Productivity Workloads performed upon systems with battery life setting enabled. Actual battery life will vary based on screen brightness, applications used, features selected, power management settings, battery conditioning, and other customer preferences. LAN, wireless LAN or hard drive usage may also have a significant impact on battery life.

8) Service and warranty turnaround time may vary by country and product. International warranty valid only for products purchased in North, Central, and South America.
